After your file has synced, it will be available in your Downloads folder.

1. Extract the ZIP file.
2. In Lightroom, go to Edit > Preferences (Windows) or Lightroom > Preferences (Mac).
3. In the Presets tab, click on the "Show Lightroom Presets Folder". A folder will open. Copy all of the folders inside the Develop Presets folder that you extracted in Step 1 into your Lightroom\Develop Presets folder.
4. Restart Lightroom. The presets will appear in the Presets panel located in the Develop module.

Can’t find the download?

1. Open the Creative Cloud desktop application, click the three vertical dots icon in the upper-right, and then select Preferences.
2. Click Creative Cloud and select Files. Ensure that File Sync is enabled.
