## How to Install

To install ACR look profiles for Lightroom & Photoshop for use this Camera RAW, locate the package 'DELUTS ACR Look Profiles' downloaded from the store, look for a zip file or unzipped folder for Mac. Then drag the subfolder also with the same name into the 'Settings' folder as located below.

Mac(user)/Library/Application Support/Adobe/Camera Raw /  
Settings

Win(user)/Application Data/Adobe/Camera Raw/Settings

C:\Users-[user name]\AppData\Roaming\Adobe\CameraRaw\

## Settings

When opening folders generated on a PC please make sure you delete any files that do not end in '.xmp'. Also on Windows system if you have any trouble place all the '.xmp' directly into the Settings folder without any folders or subfolders. The internal way the Looks are created will put them back in order.

On Macs, if the user Library folder is hidden. Hold the Option key down while selecting the "Go" menu in the Finder.

(Please note these presets will not work on older versions of Adobe Camera RAW and Lightroom, If you are a Adobe CC member please update Photoshop, Camera RAW & Lightroom)
